

Product Summary

First class products by the specialist in clamping technology

“The clamping tools which we manufacture are as varied as the sectors for which we work.”

RÖHM - one for all

The name Röhm stands for honesty, fairness and dependability – since more than 100 years. When it comes to powerful clamping tools, there’s only one company that can really offer everything – RÖHM. We are continually improving our products and services, actively expanding into new markets and using innovative production processes and technologies. With more than 50 registered offices and agencies – from Australia to Venezuela – RÖHM is present on every continent and is close to customers everywhere.

RÖHM – driven by technology

Partnership

Globality

Innovation

>> enduring!

Perfectly adapted in an intelligent design – persevering specialists for even the toughest jobs. Accuracy with every individual impact – and not only when impact-drilling!

>> tough!

Powerful, extremely capable and exceptionally durable. Plus top marks for processing precision. Simply great – through and through.

1 Drill Chucks NC-Tooling

Keyless Drill Chucks

Key type Drill Chucks

Short Drill Chucks

Floating Chucks

Quick Change Tapping Chucks

2 Live Centers Face Drivers

Live Centers

Heavy load Live Centers

Dead Centers

Face Drivers

>> strong!

Particularly successful and effective when power is attributed maximum priority. With a firm grip on larger sizes and heavy weights – to be sure!

>> powerful!

There's no escaping here. Even heavy parts are packed precisely and secured safely. With retention forces of up to 12 tonnes!

3 Lathe Chucks Independent Chucks

Key Bar Chucks

Plane Spiral Chucks

Lathe and Grinding Chucks

Lever Scroll Chucks

Independent Chucks

4 Vices

NC Compact Vices

NC Machine Vices

Machine Vices

Drilling Machine Vices

Precision Vices

Multiple Clamping Systems

Pallet Systems

Clamping Towers

>> grabbing!

The impressively flexible solutions for swift and dynamic clamping. Powerful, high-precision and therefore absolutely spot on target!

>> biting!

Fast movements accompanied by a lot of pressure. And with tremendous tension for an absolutely secure hold. Extremely snappy solutions – yet entirely harmless!

5 Gripping Technology

Parallel Grippers

Centric Grippers

Large stroke grippers

Indexing Units

Electrical-Grippers

Linear Modules

6 Power Chuck Technology

Power Chucks

Ball Lock Chucks

Pulling Collet Chucks

Front end Chucks

Indexing Chucks

Steady Rests

Cylinders

Driven Tools

Electrical hollow clamp

Electrical clamping head

>> expandable!

More than meets the eye. With enormous strength from within. Also eminently suitable for sensitive and particularly thin-walled workpieces!

>> efficient!

Outstanding performance thanks to perfect adaptation. Perfect in form and function. For the best-possible transfer of high retention forces – even overhead!

7

Mandrels

Cartridge Mandrels

Power Mandrels

Segment Mandrels

Hydraulic Mandrels

8

Tool Clamping Systems

Rotary Distributors

Release Units

Clamping Sets

Machine Tool Tapers

Electrical Release Units

Clamp by wire

Springless Clamping System

A photograph of several red ants carrying a large, green leaf fragment across a dark surface. The background is a bright blue sky with a sun flare in the top left corner.

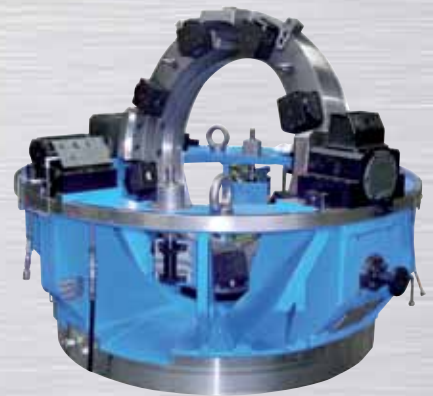

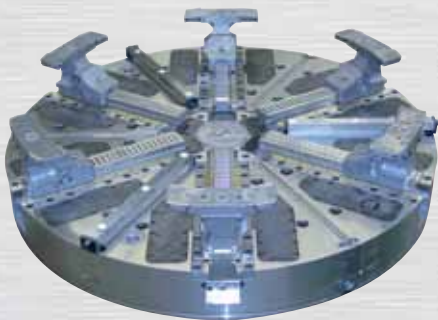

>> intelligent!

Our understanding of consistent customer orientation primarily involves the development of individual solutions in the entire range of clamping technology. We accept and master even the most difficult challenges.

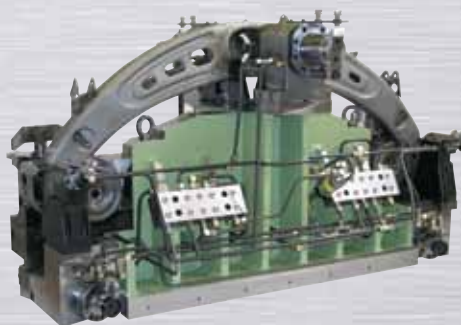

Our motto is: Anything is possible, anything can be done!

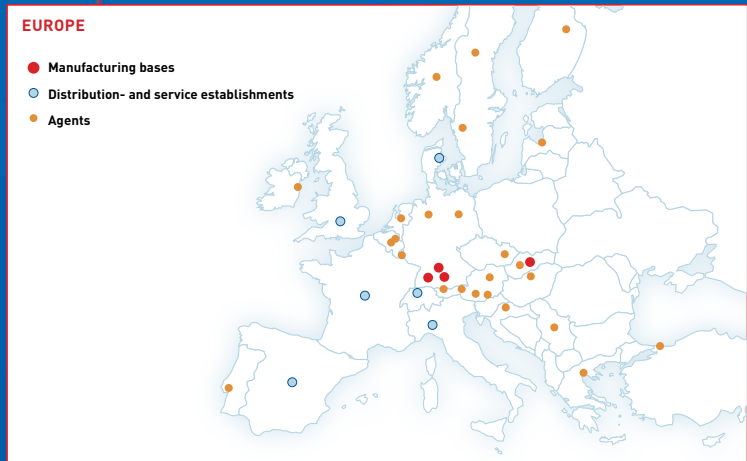

Special Designs

Special Design Chucks for Symmetrical Components

Non-rotating Clamping Devices
